

June 2018

Minuit Une is hiring a Lighting Operator

Company description

Minuit Une is an engineering company that designs, develops and manufactures a new lighting technology: the IVL Lighting. IVL lighting by Minuit Une revolutionizes the way to use lighting in scenography.

Founded in 2013 in France by two optical engineers, the company has never stopped growing since then, focusing on two priorities:

- Delivering the best worldwide user and customer service for IVL products (IVL Carrés and IVL Pyramides)
- Innovation & development: half of the company is composed of engineers working on the next technological disruptions in lighting design.

Job description

You would fully be part of a young, dynamic, challenging and growing company. You would be working for the application and operation services and be in charge of the following missions:

- Lighting programming / trade show
- Create lighting plots
- Provide systems maintenance / support for customers
- Train clients (DMX, maintenance)
- Hold technical presentations / products demos
- Mandatory mobility (worldwide missions will be asked)
- Manage inventory
- Creating resources, default show, prepared console for the IVL Community

Candidate profile

- Almost perfect level of English. (Another language is a plus)
- Very good knowledge of Audiovisual systems in general, and good experience with lighting consoles specifically
- Good knowledge of WYSIWYG/Capture/VectorWorks
- Basic knowledge of audio and video editing.
- Enthusiastic about lighting and the live events industry.
- Serious, punctual, decisive and assertive.
- Good arrangements skills.
- Good team work skills.
- Open for travel and dynamic work.
- Artistic and creative.

Permanent position (CDI) :

Salary based on experience
